The Institute of Cartography and Geoinformatics (ikg) invites application for the position of a

Scientific Assistant (m/f/d) within the DIVIAS project (Salary Scale 13 TV-L, 100 %)

to be filled from October 15, 2023. The position is limited to 3 years.

Tasks

The DIVIAS project aims to systematically bring together hitherto scarcely linked scholarly methods and practices in the digitization, research and representation of collections from colonial contexts will be systematically brought together in a research platform and thus made more effectively usable.

The tasks at the ikg are in the field of visualization of spatio-temporal phenomena. This includes 2D and 3D visualization using generalization and aggregation methods as well as the visualization of uncertainties.

Requirements

A university science degree in geodesy, geoinformatics or computer science / Computer graphics is required for the position. Above-average grades, very good computer and programming skills are expected, as well as an enjoyment of scientific work. Experience in the field of visualization is an advantage.

We offer an attractive position in an interdisciplinary team and in a highly topical field of research. A doctorate is expressly desired.

Leibniz University Hannover considers itself a family-friendly university and therefore promotes a balance between work and family responsibilities. Part-time employment can be arranged upon request.

The university aims to promote equality between women and men. For this purpose, the university strives to reduce under-representation in areas where a certain gender is under-represented. Women are under-represented in the salary scale of the advertised position. Therefore, qualified women are encouraged to apply. Moreover, we welcome applications from qualified men. Preference will be given to equally-qualified applicants with disabilities.
